Jiwon Jeong

AI Research Engineer

jwjw9603@gmail.com | github.com/jw9603 | LinkedIn | Hugging Face | jw9603.github.io

Research Interests

Attention Architecture and Efficiency, Mechanistic Interpretability

Education

Sungkyunkwan University (SKKU) — Suwon, South Korea
M.S. in Artificial Intelligence — *Mar. 2022 – Aug. 2024*
- Advisor: Prof. Hogun Park
- Research: Commonsense QA, Logical Fallacy Detection

Kookmin University — Seoul, South Korea
B.S. in Electronic Engineering — *Mar. 2016 – Feb. 2022*

Publications

Under Review — 2026
- Two papers under double-blind review at ICLR 2027 (titles withheld)
- One paper under double-blind review at the UniReps 2026 workshop (title withheld)

NeurIPS 2026 Workshop on SLMs for Agentic Systems (SLM-Agents) | *Poster* — 2026
- Beyond Query Linearity: The Case for Nonlinear Queries
- **Jiwon Jeong**, Dun Li Chan, Andrew Ceniccola, Rahul Sharma, Simon Sang, Parva Mehta, Pietro Di Nicco, Karim Saraipour, Marko Karbevski

The 7th Korea Artificial Intelligence Conference — 2026
- Beyond Recovery Rate: Post-Recovery Verification and Reporting Gaps in Failure-Aware Evaluation of LLM Agents
- **Jiwon Jeong**, Hyunmook Cha
- PDF

NAACL 2025 Findings — 2025
- Large Language Models Are Better Logical Fallacy Reasoners with Counterargument, Explanation, and Goal-Aware Prompt Formulation
- **Jiwon Jeong**, Hyeju Jang, Hogun Park
- arXiv

KSC 2022 | *Outstanding Paper Award (Top 10%)* — 2022
- Improving Commonsense-based QA Model through a Cycle-Encoder
- **Jiwon Jeong**, Soyoung Lee, Hogun Park
- DBpia

Professional Experience

AI Research Engineer — Sep. 2025 – Present
Lotte Innovate – AI Tech LAB, Language AI Team — *Seoul, South Korea*
- AI Research Engineer responsible for LLM research and enterprise deployment

Teaching & Mentoring

Online Mentor — Feb. 2026
LIKELION – AI NLP Engineer Intensive Course, 3rd Cohort — *Remote*
- Mentored 4 teams on AI-based service development projects using corporate and public data
- Provided code review, project coaching, and Q&A support via Discord

Teaching Assistant — 2023 – 2024
Sungkyunkwan University — *Suwon, South Korea*
- TA for Language Model course (SWE3032-41) and Deep Learning advanced courses for non-CS educators

Activities

Runner – "Reading LLM Technical Reports" (13th Cohort) Oct. 2026 – Present
Pseudo-Lab (link) – Non-profit AI research community *Remote*

- 16-week study reading recent LLM technical reports in depth: architecture, data, training, and whether each claim is supported by its evidence
- The cohort plans to write a survey paper on LLM technical reports after the study

Research Contributor – ConspiracyBench Sep. 2026 – Present
Stationhouse (link) – Open research community for open model research *Remote*

- Contributing to schema design and benchmark item submission for an LLM evaluation benchmark

Runner – "Deep Dive into LLM" (12th Cohort) Mar. 2026 – Jul. 2026
Pseudo-Lab (link) – Non-profit AI research community *Remote*

- Studied Stanford CS336: Language Modeling from Scratch (2026) through weekly online discussions

AI Researcher Aug. 2025 – Jan. 2026
B-Peach LAB (Tech for Impact) *Remote*

- Designed evaluation metrics for AI-powered text adaptation service improving information accessibility for slow learners
- Conducted research on adaptation quality assessment

Projects

Open Source Contribution: Hugging Face Transformers | *Python, Transformers* Mar. 2026 – Present

- Removed six dead beam-search dummy classes left over from v5 cleanup, fixing a repository consistency check failure on PyTorch-less installs (PR #45722, merged Apr. 2026)
- Reported and fixed a protobuf decode error masking bug in tokenizer loading (PR #45486, merged Apr. 2026)
- Fixed a bug in continuous batching for multimodal models. Added input preprocessing and fallback mechanism for non-text-only models (PR #44436, merged Mar. 2026)

MCP Server for ChatGPT Apps | *Python, FastAPI, MCP* Jan. 2026 – Present

- Built MCP (Model Context Protocol) servers for ChatGPT Apps (OpenAI)
- Designed middleware architecture connecting frontend, backend, and LLM-powered enterprise solutions

Korean LLM Benchmark | *Python, LLM, Evaluation* Dec. 2025 – Jan. 2026

- Evaluation framework for Korean LLM performance with standardized metrics and reproducible pipelines

Awards

KSC 2022 Outstanding Paper Award | *Top 10% of accepted papers* 2022

Text Ethics Hackathon – 2nd Place Nov. 2021 – Dec. 2021

- Developed ELECTRA-based classification model for detecting hate speech and biased text

Technical Skills

Languages: Python
Frameworks: PyTorch, Hugging Face Transformers, FastAPI, LangChain, Docker
Research: NLP, Transformer Architecture, Mechanistic Interpretability, LLM Fine-tuning, Prompt Engineering, Model Evaluation, MCP
Tools: Git, Linux, Weights & Biases, Jupyter
